## Project Manager Power Electronics – Space (m/f/d)

### Company

On behalf of our client – an established German manufacturer of high-reliability power electronics for space and New Space applications – we are looking for an experienced **Project Manager (m/f/d)** to steer demanding development and production projects from requirement to delivery.

### Key Responsibilities

- Leading customer and internal development projects (development, qualification, production) based on **PMI / PMBOK**
- Overall responsibility for time, scope, cost and quality – technical, commercial and programmatic
- Implementing the required **Q-Gates** incl. documentation
- Coordinating subcontractor work packages and project resources
- Project reporting, lessons learned, change and claim management
- Supporting management and sales in business acquisition

### Requirements

- Bachelor's/Master's degree in **Electrical Engineering** or comparable
- Solid PM knowledge and several years' project management experience in the **space industry**
- Customer-oriented, communicative, well-organised, decisive
- **English** business-fluent, **German** an advantage

### Perspective

- A responsible role in one of the most exciting technology fields, short decision paths, a highly qualified team and an attractive package.
